

Take & Make

Snowflake Ornaments!

Materials Provided:

- Blue Foam
- 20 Q-Tips
- 1 Pom Pom
- Ribbon
- Circle Template

Additional Materials Needed:

- Pen/Pencil
- Hole Punch
- Scissors
- Glue

Directions

- Use the provided template to trace a circle onto the sheet of blue foam, then cut it out.
- Hole punch the top of the foam to make a hole for the string.
 - I suggest doing this first, before gluing on the q-tips (like you see in the picture).
 - If you don't have a hole punch, you could use scissors to poke a hole through the foam.

- Glue the white pom pom to the center of your cardboard circle.

- Now comes the fun part where you get to customize your snowflake so it's unique to you! Remember no 2 snowflakes are the same!!
 - First lay out your snowflake design.
 - Depending on your snowflake design, you can cut q-tips into different lengths and sizes. Cut some in half and cut some smaller pieces for the end of the snowflake.

- Then start to glue the q-tips to the foam, starting with the pieces attached to the pom pom first.

- Allow the glue to dry completely, and then the ribbon through the hole and knot! Your snowflake ornament is ready to hang!

Here are some ideas for snowflake designs:
